SUMMARY

Sales director who builds AI tools and trains people to actually use them. I built an AI sales assistant, trained my 9 person team on it (all 9 use it daily, saving each rep 30 minutes a day), then automated it in n8n. Top closer at my company in 2023, two time UWM Top 1% award winner (2024 and 2025), $30.6M in lifetime loan volume, and leader of a team that has closed 434 loans since 2024. Looking for an AI implementation or enablement role turning AI tools into everyday results.

AI PROJECTS AND IMPLEMENTATION

- **Sales Call Cheat Code (AI call coach):** Built a Claude API app that transcribes calls, tells the voices apart, strips personal info, and coaches the rep on what went well, what went wrong, and what to say instead. Live mode shows what to say next about 1.6 seconds after the client stops talking and caught 92% of key moments on 25 unseen test calls. Tested on 45 role play calls with 140 automated tests; team pilot awaiting company approval. Demo video: braydonhartai.com
- **Sales Text Cheat Code (AI sales assistant):** Built an assistant that writes the right reply to any client text and plans follow ups. All 9 reps use it daily, saving each 30 minutes a day (4.5 hours across the team). Then automated it: it replies to incoming client texts on its own or holds each reply for the loan officer's one tap approval, using wording that gets delivered on texting platforms like Bonzo
- **Automated sales system in n8n:** A 4 part automation connecting Claude, OpenAI, Google Sheets, and Gmail: a chat coach, a weekday 8am email of follow ups with drafted texts, call recaps, and a gamified scoreboard
- **Multi agent AI systems:** Built Stitch Bench, an AI design team where a designer drafts, two AI reviewers critique, and the designer revises before automated checks validate the final machine files. Built an AI crew that runs Azoki Market, an Amazon store that launched with 12 products, publishing listings and reporting sales, with human approval on spending
- **Gremlets (Mac app for Claude Code users):** Designed 50 original pixel creatures and built the Swift Mac app, its animation engine, web and iPad versions, a Chrome extension, an MCP server, and Claude Code hooks that show each coding session as the creatures think, wait, and finish; 221 automated tests. Try it: braydonhartai.com/#gremlets
- **Team tools:** Funnel dashboards that target each rep's weak spot, an automated client proposal PDF generator, and a pipeline tracker simplified for real adoption

PROFESSIONAL EXPERIENCE

MortgagePros, Troy, MI

Director February 2024 to Present

- Lead, train, and develop a team of 9 licensed loan officers; team has closed 434 loans since I took over, earning UWM Top 1% awards in 2024 and 2025
- Run recurring funnel reviews and set individualized weekly goals, using data to pinpoint where each rep gets stuck
- Interviewed 10+ candidates and hired 4 loan officers; trained and developed 2 reps who were promoted into leadership roles

Loan Officer March 2022 to February 2024

- Ranked #1 closer company wide in 2023, earning promotion to Director
- Personally closed 84 loans in under two years
- Explained complex loan options in plain language so clients could make confident decisions

ENTREPRENEURSHIP

- **Founder, custom blanket and tapestry shop (Etsy)** · 2022 to 2024 · Built and ran a profitable online shop selling original custom designs; relaunched in 2026 on Amazon as Azoki Market, run by an AI crew I built
- **Product design** · Since 2022 · Sketch my own characters, model them in Blender, and 3D print them; designed a vinyl figure and its retail box, then worked with an overseas factory to manufacture it and sold it to collectors online

SKILLS AND TOOLS

- **AI tools:** Claude (primary), Claude Code, Claude API, MCP, agents and subagents, ChatGPT, OpenAI API, prompt writing, speech to text
- **Building:** Swift, TypeScript, JavaScript, HTML and CSS (built with Claude Code), Netlify · **Design:** Blender, 3D printing, packaging design
- **Automation:** n8n (scheduled workflows, webhooks, forms, AI agents), Google Sheets and Gmail integrations, HTML to PDF document automation
- **Implementation:** spotting manual work worth automating, training teams on new tools, driving adoption, simplifying tools based on user feedback
- **Data:** funnel and conversion analysis, KPI dashboards, Excel · **Platforms:** Salesforce (built reports and dashboards), Bonzo, Dialpad, Microsoft Excel

CERTIFICATIONS, LICENSES AND EDUCATION

- **Google AI Essentials Specialization**, Google via Coursera (2026), all 5 courses
- **22 Anthropic Academy certificates** (2026), including Building with the Claude API, Model Context Protocol (intro and advanced), Claude Code in Action, Agent Skills, Subagents, and Deploying Claude Enterprise
- Licensed Mortgage Loan Originator, NMLS #1925352 · Coursework, Macomb Community College
